Fuel Advisor

COMING SOON

INTEGRATED TANKERING SOLUTION

Maximize your savings on every trip with ForeFlight's upcoming integrated and automated tankering solution for flight departments.

Built into **ForeFlight Dispatch**, Fuel Advisor continuously analyzes all upcoming flight plans, airport and FBO fees, and your contract Jet-A prices to calculate the optimal tankering scenario for a given aircraft.

Fees		\$0	Apply tankering scenario
Fuel	18,345 lb	\$14,218	
Total		\$14,218	
Savings		\$2,601

Automatic Leg Analysis

The tight integration with Dispatch allows Fuel Advisor to automatically recognize tankering opportunities based on closely-spaced legs with the same aircraft.

Contract Prices Imported

With ForeFlight's JetFuelX fuel card management feature your contract Jet-A prices are readily available for tankering calculations.

Detailed Cost Comparison

Gain insight into any tankering calculation with helpful details showing the cost savings per pound tankered at each airport, as well as a scenario's impact on the total trip fuel required.

COST COMPARISON

Uplift	7,563 lb / 1,120.4 gal
Fuel	\$4,202
Fee	\$0
Tankering Gain	\$440 per 1000 lb
Trip Fuel Increase ⓘ	8 lb per 1000 lb

Integrated Weight, Obstacle, & CG Limits

Fuel Advisor automatically considers aircraft weight limits, runway and obstacle clearances, and W&B results to calculate the most optimal tankering scenario.

METRICS

	ACTUAL	LIMIT
TOW	59,445 lb of	91,000 lb
TO Fuel	11,204 lb of	37,524 lb
Tanker Fuel	0 lb of	26,320 lb
LW	51,363 lb of	75,300 lb

Fees		\$0
Fuel	18,345 lb	\$14,218
Total		\$14,218
Savings		\$2,601

Savings Highlighted

Fuel Advisor's cost summary totals up the cost of fees and fuel and compares it against the pre-tankering plan to show how much you've saved.
