

Boeing Mobile Logbook

State of the art mobile application that replaces paper logbooks and is a **single-source solution** across your fleet. **Integrated**, efficient interfaces (Pilot, Crew and Maintenance) with **24/7/365** customer support.

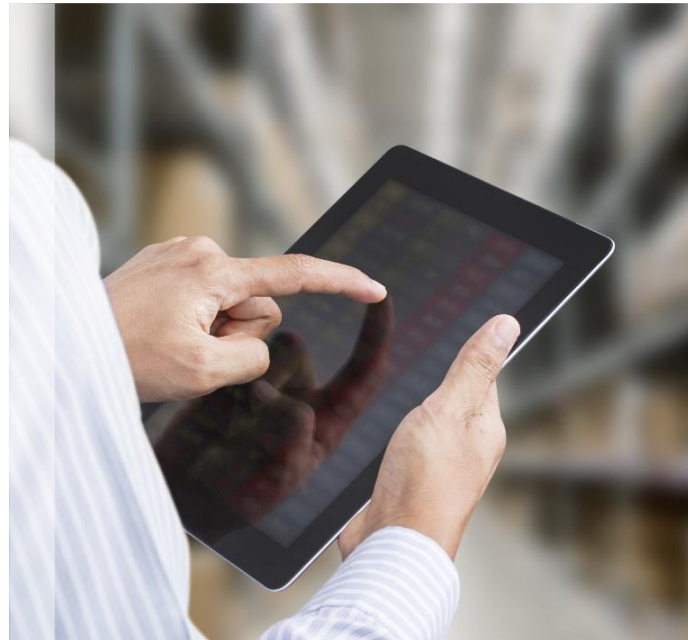

Replacement to paper logbook

Intuitive and prefilled data fields for speed and ease of data entry

Ensures data accuracy, legibility and record completeness

Eliminates time and effort intensive management of paper logbooks

Integration with airplane systems, Boeing maintenance and EFB apps

Engineering,
Modifications &
Maintenance

Improve your data capture accuracy and reliability

Boeing Mobile Logbook is a state of the art, mobile application that replaces paper logbooks for your entire fleet regardless of what airplanes you operate.

Enables efficient and accurate documentation of flight acceptance details, pre-flight, in-flight, post-flight faults, servicing details and fault repair or deferral information. Operators become more efficient by eliminating non value added time and processes of accounting and managing paper logs.

The intuitive interface and prefilled data fields of all 3 unique interfaces of Boeing Mobile Logbook i.e. pilot, cabin and maintenance, improves completeness, legibility and data accuracy of the record.

The vision of Boeing Mobile Logbook is to integrate with airplane systems and other Boeing maintenance and EFB applications providing much needed maintenance and crew efficiencies through automation and seamless data exchange.
