

189Y Passenger Cabin Modifications

Pre-designed solutions for fast airplane modifications

3 to 4 month lead-time

Enables fast airplane transitions

Maximize seat capacity

189 seats on the 737-8 or 737-800

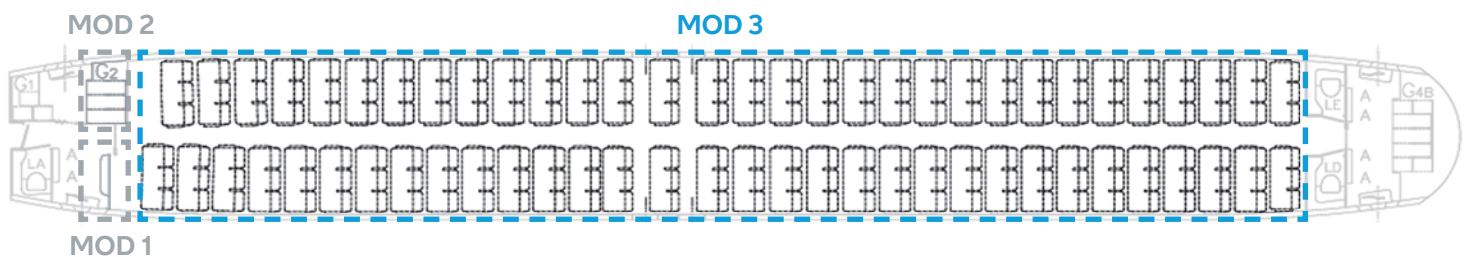

Seat choice

4 most popular seat models

Elevate your airline operational efficiency and profitability with our innovative retrofit modifications designed to maximize the passenger seat count for Boeing 737-8 and 737-800. This strategic enhancement not only increases your capacity but also optimizes your revenue potential per flight, allowing you to meet growing passenger demand. Our EASA STC with FAA validation pre-designed solutions ensure a rapid turnaround time of 3 to 4 months which minimizes downtime making it an ideal solution for lease transitions.

Depending on incoming airplane configuration, we offer three modifications to achieve 189Y configuration with four popular economy seat choices.

Modification 1: G7 Windscreen Installation Kit (G7 Windscreen is SFE)

Modification 2: G2 Galley Installation Kit (G2 Galley is BFE)

Modification 3: Cabin Reconfiguration Kit to achieve 189Y maximum passenger configuration

Pre-qualified economy seat options
