

# 737 Door One Windscreen Kit

Maximize seating capacity without sacrificing comfort or design

## 3 month lead-time

Enables fast airplane transitions

## Maximize seat capacity

189 seats on the 737-8 or 737-800

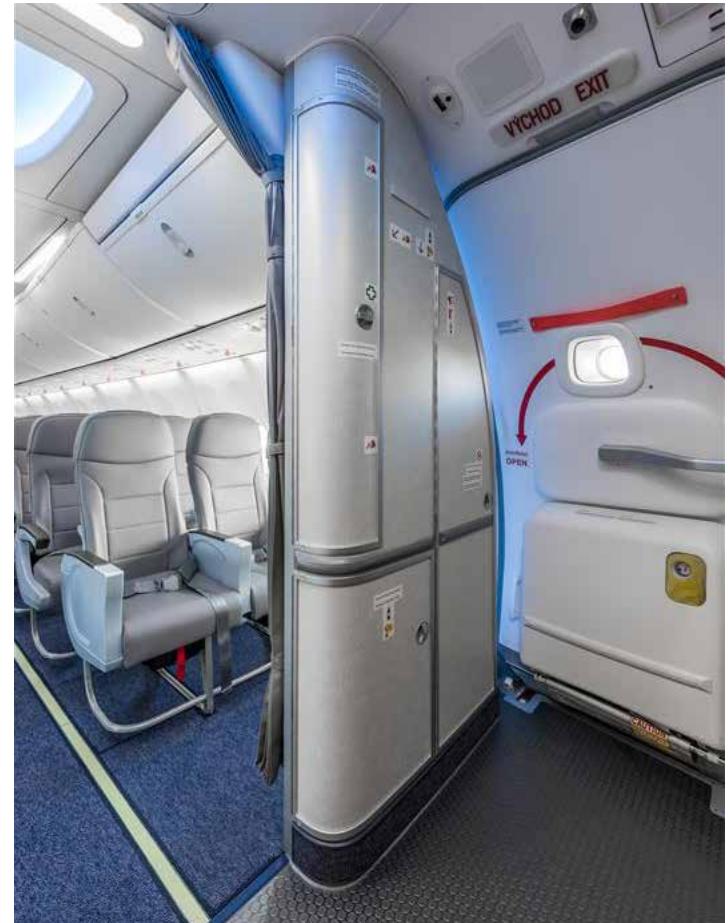

## Pre-engineered solution

EASA certification with FAA validation

The 737 Door One Windscreen Kit replaces the G7 galley or closet with a slim windscreen allowing for maximum capacity of 189 seat configuration.

Designed by Boeing, the coordinated accent lighting of the windscreen seamlessly integrates into the Boeing Sky Interior (BSI) for both Standard Pivot Bin and Space Bin configurations. Windscreen storage with four compartments plus an additional stow bin ensure that you maintain space for important operational and safety equipment.

Produced by Boeing with the same parts, quality and durability as factory delivered airplanes, the 737 Door One Windscreen Kit includes an EASA certified STC with FAA validation, sidewall, stow bin, SFE windscreens, and installation parts kit.

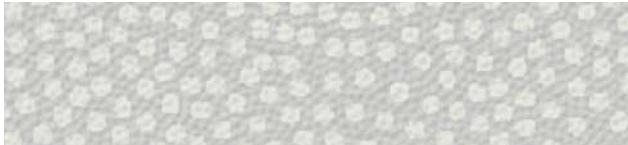

See back for more information.

# 737 Door One Windscreen Kit

Maximize seating capacity without sacrificing comfort or design

## Supports 12-week delivery

The standard windscreen kit is pre-configured with popular decorative laminates and finishes for delivery within 12 weeks. Custom finishes are available with additional lead time.

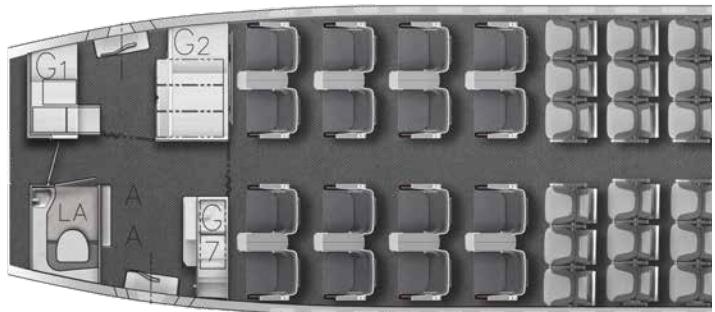

Decorative Laminate (BAC 94787)

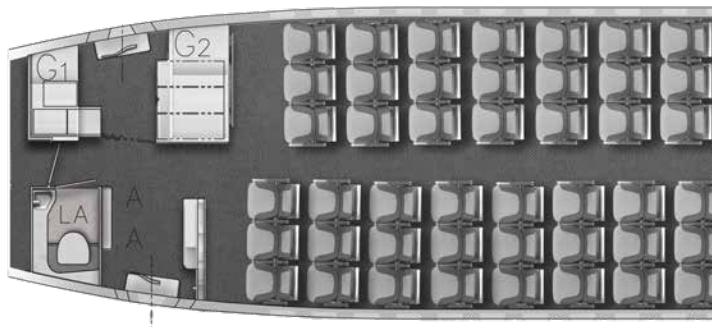

Rubstrip (BAC 70960)

Kickstrip (BAC 714)

Typical starting configuration with G7 Galley

Replace G7 Galley with 737 Door One Windscreen. Note that seat reconfiguration is a separate modification.
