

189Y Passenger Cabin Modification

Pre-designed solutions for fast airplane modifications

3 to 4 month lead-time

Enables fast airplane transitions

Maximize seat capacity

189 seats on the 737-8 or 737-800

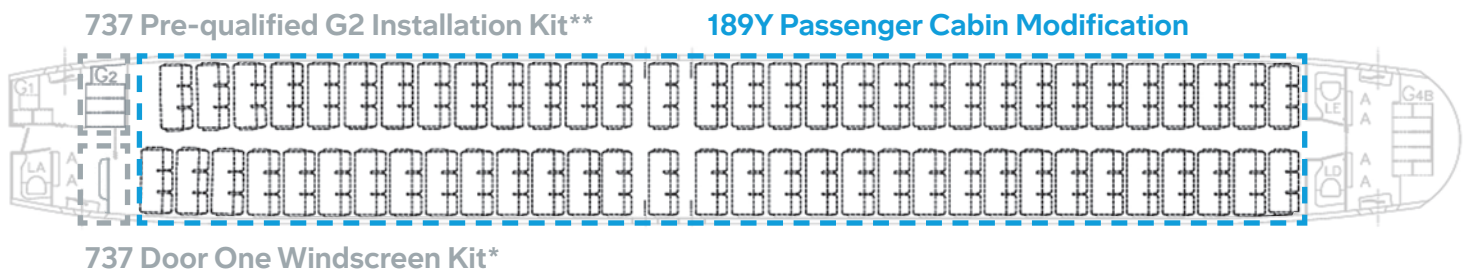

Seat choice

4 most popular seat models

Elevate airline operational efficiency and revenue potential with our pre-engineered retrofit solution for the Boeing 737-8 and 737-800. Designed to support a 189Y seat configuration. This modification enables operators to maximize passenger capacity while minimizing downtime.

Our EASA STC with FAA validation is based on the six most common aircraft configurations and offers four popular economy seat choices, with a rapid implementation timeline of 3 to 4 months - making it an ideal solution for lease transitions and fleet optimization.

The 189Y pre-certified modification is available only with the 737 Door One Windscreen Kit*, the full G2 Galley upgrade using our 737 Pre-qualified G2 Installation Kit**, or both.

Pre-qualified economy seat options include:

Recaro: BL3710, SL3710

Collins: Meridian, Pinnacle

* 737 Door One Windscreen Kit – Includes the Door One Windscreen, pivot or Space Bin bucket, sidewall, and installation parts.

** 737 Pre-qualified G2 Installation Kit – Includes installation parts and sidewall. The G2 Galley is BFE.
